

# THE NEWS - Spring 2012

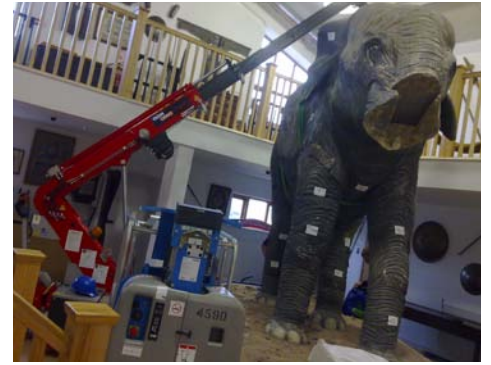

## ELEPHANT PROJECT

An very unique project for P&M was packing and shipping a full size model elephant in full battle armour, complete with Howder and model soldiers.

This was carefully broken down at Stratford Armouries using a mini crane and power pack.

It was then packed and shipped to a museum in Canada.

## AIRCRAFT

One of the more unusual jobs for us is to pack helicopter blades prior to shipment abroad.

If a helicopter is repositioning overseas then the blades are removed at port and packed carefully for the journey.

## PROPELLOR SHAFT

When local liners need their heavy engineering moved; they call in the project experts to do the job.

Here, Arcadia's shaft is being lifted into our storage facility prior to being packed and shipped for renovation.

## SECURE STORAGE

We have a massive secure storage facility in Eastleigh, ideal for larger goods that require short or long term storage. The facility is under 24 hour security.

Individual lock-up stores are also available for smaller goods, documents, and accounts.

**CLASSIC CARS | MILITARY VEHICLES | NEW CARS | CARAVANS | RIBS | YACHTS | TRAILERS  
STOCK | FURNITURE | MACHINERY | CONTAINERS | HOUSEHOLD GOODS & EFFECTS**

## THE SPECIALISTS IN DANGEROUS GOODS PACKING

Dangerous goods shipping is a minefield!

We are authorised to pack and ship dangerous goods, by air, sea or road. We are happy to advise what goods require special packing and documentation, and the best method to ensure you conform legally. Just call!

*IATA, IMDG, ADR Approved*

*We Pack and Ship all types of Dangerous Goods*

## MAXI YACHT MAST PACKING

*RAN II* is one of the fastest yachts in world racing, competing in numerous regattas worldwide (She won the world-famous Fastnet Race in both 2009 and 2011). When she wants her mast shipped, she calls on our MAST PACKING system for protection whilst in transit.

Our team meet the yacht at the dock and arrange everything, so that delicate masts and spars have the best chance of arriving safely; and ready to race!

The system is very popular with race yachts and works well with any industrial project that requires protection.

Many famous yachts have employed the system including: *Leopard*, *Ran*, *Oyster*, and others.

## FLIGHT CASES FOR LEADING BANDS

We have been busy producing numerous Flight Cases for many of the leading bands including Kings of Leon, Kylie, Take That and U2.

They offer protection for a wide range of products from musical and computer equipment to canteens, fridges, sofas, and show display equipment.
