

## NEW PRODUCT **STORM CASES**

**WATERPROOF, UNBREAKABLE,  
GUARANTEED FOR LIFE**

Another new product range from P&M Packing - the UK specialists in the protection of goods whilst in transit.

Storm Cases are available in a range of colours and sizes to suit most applications.

With their water resistant features they are ideal for every type of marine application

Made from a patented HPX high performance resin, the award winning Storm Case provides the ultimate solution for the protection of fragile or valuable contents, such as cameras, computers, or electronics. The range is ideal for all outdoor applications.

Cases come in a variety of shapes and sizes to suit most applications, and provide a safe environment free from moisture or salt water, shock and impact blows, as well as vibration and dust. For additional protection, bespoke foam inserts can be precision cut for custom configurations.

Storm cases feature unique press and pull latches, which are easy to open at the push of a button, yet remain securely closed under impact or stress. A permanently attached valve automatically adjusts the air pressure in the case without letting in water. The specialist-moulded hasps allow for fitting of a standard sized padlock.

The Storm Trak® range of cases feature in-line wheels and telescopic handles. These lock in place and stow neatly away when not in use, making the case easier to transport when filled with heavy loads. These are ideal for accompanied baggage around an airport.

Ideal for leisure, commercial or military applications where exposure to extreme elements can be anticipated including underground; off-road, marine or high altitude situations... and they are bear proof !

**Every Storm Case  
is guaranteed for life.**
