The Reliable Solution for all your Packing Needs

After 12 months of explosive growth at P&M Packing, the decision was taken to expand the operation into a large, secure storage and production facility, with offices, at the former rail works in Campbell Road, Eastleigh. This is alongside the existing, well-established packing production base.

Having all storage and workshops onsite has increased security and made the company more efficient as different workshops can easily work together to complete jobs. The larger premises allow us to carry out more projects at the same time, while the flight case and mast packing workshops have also increased in size to fulfil a growing order book.

Telephone and email address remain unchanged and our quality services will continue as before. Entrance is via the third security gate along Campbell Road, just follow the signs...
